CALCULATIONS:

In the **INPUT** fields all values can be changed, except from some values in some sheets. In that case a general value for that type of equipment is filled in as a fixed value.

IMPORTANT: NEVER USE A COMMA , BUT ALWAYS A DOT .

- Example: 0,6 == => not correct ! 0.6 == => correct !
- Be aware of filling in wrong or illogical values in the INPUT fields. For some mistakes warnings will pop up, but not for all wrong or illogical values a warning might occur.

Project:	<input type="text" value="Lashing Container 1"/>	Description:	<input type="text" value="Hk-0"/>
Client:	<input type="text" value="G Demo"/>	Date:	<input type="text" value="2015-09-24 08:41:40"/>
Author:	<input type="text" value="B Aston"/>		modified

Don't use a dot or comma in this fields
